

```
const express = require('express');
const mongoose = require('mongoose');
const app = express();
const PORT = process.env.PORT || 5000;

// Connect to MongoDB
mongoose.connect('mongodb://localhost:27017/myDatabase', { useNewUrlParser: true, u
  .then(() => console.log('MongoDB connected'))
  .catch(err => console.error('MongoDB connection error:', err));

// Define routes
app.get('/api/data', (req, res) => {
  // Implement your logic to fetch data from MongoDB and send it as JSON response
});

// Serve React frontend
app.use(express.static('frontend/build'));
app.get('*', (req, res) => {
  res.sendFile(path.resolve(__dirname, 'frontend', 'build', 'index.html'));
});

app.listen(PORT, () => console.log(`Server running on port ${PORT}`));
```

```
import React, { useState, useEffect } from 'react';
import axios from 'axios';

const App = () => {
  const [data, setData] = useState([]);

  useEffect(() => {
    fetchData();
  }, []);

  const fetchData = async () => {
    try {
      const response = await axios.get('/api/data');
      setData(response.data);
    } catch (error) {
      console.error('Error fetching data:', error);
    }
  };

  return (
    <div>
      <h1>Landing Page</h1>
      <ul>
        {data.map(item => (
          <li key={item.id}>{item.name}</li>
        ))}
      </ul>
    </div>
  );
};

export default App;
```
